EXPERIENCE**Junior Data Analyst**, Los Angeles Apparel, Los Angeles, CA 02/2024 - 05/2024

A mid-sized, clothing manufacturer known for its ethically made, high-quality garments

- Collaborated with cross-functional distribution teams to identify and implement process improvements related to data-processing errors within the company's CRM, improving inventory accuracy by 12.5%
- Constructed and applied automated data quality checks within Excel to reduce errors in daily/weekly reporting, resulting in 50% fewer erroneous reports
- Implemented 75% of existing standard operating procedures within the main distribution center, liaising between the floor and management to ensure all parties were informed of current production trends
- Designed dashboard visualizations within Power BI for 100% of existing reports, providing management with concise data-derived insights related to production, marketing, inventory, and advertising activities

Risk Advisory Associate, Grant Thornton LLP, Los Angeles, CA 07/2022 - 09/2023

A leading global professional services network specializing in audit, tax, and advisory services

- Performed IT auditing activities, identifying potential risks and analyzing client data within Excel/SQL to optimize internal processes, contributing to more than 12 clients on over 25 reports within the first year
- Maintained project management responsibilities to ensure 100% successful adherence to project timelines and realization of the firm's materiality goals within 5% of projections
- Leveraged the firm's off-shore team by providing real-time meaningful feedback, guidance, and responsibilities while leading direct communications with client contacts, resulting in the development of 10 team members

Business Tax Intern, Grant Thornton LLP, Los Angeles, CA 06/2021 - 09/2021

- Assisted in the preparation of federal/state returns for corporations/partnerships, achieving a 100% timely filing rate
- Provided analysis and corrections on financial statements for the main client, utilizing Excel and GoSystem TaxRs to report to managers, increasing financial statement accuracy for this client by 10%

PROJECTS**Custom Inventory Management System**, Los Angeles Apparel 01/2024 - 06/2024

- Developed and instituted an Inventory Management System via Google Sheets to work in conjunction with the ERP, utilized by 50 team members to support a Private Label Project that amassed \$20,000,000 in sales within a fiscal quarter, and elevated inventory accuracy by 25% within two weeks of implementation
